## **MEDIA UPDATE / CALENDAR LISTING**

**WHO:** Miami Museum of Science & Planetarium

**WHAT:** Laser Fest Weekend 2006

Come experience the most spectacular music-filled laser light show in all of South Florida! Listen to your favorite classic rock music in surround sound while watching animated colorful lights shoot across a 65-foot diameter, four-story tall dome projection screen.

Choose from four different laser light shows or attend them all!

**WHEN:** Friday, December 29 and Saturday, December 30, 2006

Show #1 Pink Floyd: Echoes – 9:00 PM  
Show #2 The Best of the Doors – 10:00 PM  
Show #3 Pink Floyd: Dark Side of the Moon - 11:00 PM  
Show #4 The Best of Led Zeppelin - Midnight

**WHERE:** Miami Museum of Science & Planetarium  
3280 South Miami Avenue  
Miami, FL 33129  
Public phone: 305-646-4200

**COST:** Adults \$7.00 per show; Children \$4.00 per show  
\*Laser show admission includes laser glasses to enhance images on the dome.

Also at the museum, The Science of...Aliens. This interactive exhibit explores the real science behind the search for alien life. Through four distinct zones that include thought provoking interpretations, colorful interactivity and pop culture attributes, this exhibit will guide visitors into what life might be like "out there."

**INFO:** Founded in 1949, the Miami Museum of Science & Planetarium is accredited by the American Association of Museums and is an affiliate of the Smithsonian Institution. Explore the exciting and intellectually stimulating exhibits, Planetarium and Weintraub Observatory, Wildlife Center and Falcon Batchelor Bird of Prey Center, theater shows, and much more. For more information about Laser Fest Weekend 2006, the Science of Aliens exhibit or the Miami Museum of Science & Planetarium, visit [www.miamisci.org](http://www.miamisci.org).
