

Questions for Thought...

Note to all Nano Day participants: Use the following set of questions as guide for your conversation(s) with the different scientists during the Conversation session. You don't have to ask all these questions, but use the questions as a resource. Enjoy your one-on-one talks!

1. What are some of the products of nanotechnology?
2. What will nanotechnology bring us in the future?
3. Where do I look to find a college or university that teaches courses on nanotechnology?
4. Are there many businesses involved in nanotechnology? How about Careers?
5. How soon will I be using nanotechnology on a daily basis?
6. What kind of classes should I be taking right now during high school so that I can be ready for a career in the "nano" field?
7. What are nanofactories? What could they produce?
8. What is molecular manufacturing (MM)? Do scientists dismiss this as science fiction?
9. What is "grey goo"? What are the conflicting opinions regarding it?
10. Where can I learn more about nanotechnology and its uses?
